glad to hear it.
FTP is now working too so you can put in more pictures.
here's what you need to know.

Server is: www.sanden.com
ID: sandenlibrary
Password: sandenproducts

You'll see a several directories -- the ones of particular interest
are "Schematics" and "Schematics-print."

Place your PNG files in Schematics and they show up in the list of
schematics.

You need to put a second copy in Schematics-print...or a higher
resolution copy...either way, as long as it has the same name.
I suppose you could also delete a few items...there are now 142
product schematics -- a few more than I imagined originally.
